

NARESH KUMAR

Senior Full Stack Developer (MERN) | Team Lead

nareshbazidpuria@gmail.com | 7837625927 | Mohali, Punjab | [GitHub](#) | [LinkedIn](#)

SUMMARY

Senior Full Stack Developer (MERN) with 3+ years building and scaling production web applications, currently leading a team of 7–8 engineers. Combines hands-on architecture and backend ownership with sprint planning, mentoring, and stakeholder delivery — has shipped 9–10 production applications end-to-end.

TECHNICAL SKILLS

Languages/Frameworks: JavaScript, TypeScript, Node.js, Express.js, React.js, Next.js, React Native

Databases: MongoDB, MySQL, Redis

DevOps/Infra: Docker, CI/CD, AWS, Git, GitHub, Bitbucket

Practices & Tools: Agile/Scrum, Microservices, Unit & Integration Testing (Jest), Socket.IO, MQTT/RabbitMQ, Jira, Firebase, Electron

PROFESSIONAL EXPERIENCE

MERN Stack Developer / Team Lead

TechAbet • Aug 2022 – Present

- **Led and mentored a team of 7–8 developers** by running sprint planning and task allocation in an Agile/Scrum workflow, improving on-time sprint delivery by 30%.
- **Cut API response times by 50–60%** by redesigning Node.js/Express backend services and optimizing MongoDB/MySQL query and indexing strategy across 25+ production endpoints.
- **Reduced production incidents by 40%** by introducing unit and integration test coverage (Jest) for critical backend modules and enforcing peer code review standards across the team.
- **Cut deployment time from 3 hours to 20 minutes** by setting up CI/CD pipelines and containerizing services with Docker, standardizing build and release across environments.
- **Improved system scalability to support 10,000+ concurrent users** by decomposing a monolithic module into microservices and decoupling the database layer for independent scaling.
- **Reduced frontend load time by 35%** by rebuilding key React.js components with performance-focused rendering patterns and lazy loading.
- **Unblocked cross-functional delivery** by partnering with Product and QA to translate 15+ feature requirements into technical specs each sprint, reporting progress and risks directly to stakeholders.

PROFESSIONAL PROJECTS

Medical App (Anesthetist) — Full-stack MERN application for patient case management, live doctor support chat, and admin controls

- **Cut backend computation load by 45%** using Redis caching for high-frequency calculation endpoints.
- **Built role-based auth and an admin panel** supporting 500+ concurrent clinical users across doctor, admin, and patient-case workflows.

Railway IoT Dashboard — Real-time monitoring dashboard for railway IoT devices

- **Delivered responsive, real-time UI components** using React.js and Tailwind CSS, supporting live IoT device data feeds.

School Management ERP System — End-to-end ERP for schools built on the MERN stack

- **Implemented role-based access control** across student, parent, teacher, and administrator roles, securing 1,200+ institutional user accounts.

PERSONAL PROJECTS

Let's Chat — Cross-platform real-time chat app (React web + React Native mobile) with MongoDB/Mongoose and Redux state management.

Expense Manager — React Native + Node.js expense tracker with built-in verification; deployed and used daily.

EDUCATION

B.Tech, Computer Science & Engineering — Rayat Group of Institutions, Ropar, Punjab

2019 – 2023 • CGPA: 7.5

LANGUAGES

English, Hindi, Punjabi, Bagri (Local)
